Summary

Computer Science and Engineering student passionate about Java Full Stack Web Development and Software Development. Skilled in Java, Spring Boot, React.js, PostgreSQL, and Data Structures & Algorithms with a focus on building scalable backend systems.

Education

Bachelor of Technology (B.Tech) — Seth Jai Parkash Mukand Lal Institute of Engineering and Technology, Computer Science and Engineering — Yamunanagar, India
2023 – 2027
CGPA: 6.89 (Till 5th Semester)

Skills

Languages: Java, JavaScript

Frontend: React.js, Tailwind CSS, HTML, CSS

Backend: Spring Boot, REST APIs, Microservices, Spring Security, JWT Authentication, Apache Kafka, Spring AI

Database: PostgreSQL

Tools: Git, GitHub, VS Code

Core Concepts: Data Structures & Algorithms, OOPs, DBMS

Experience

Java Developer Intern — Stepping Skills

- Learned core Java concepts, OOP principles, and problem-solving techniques for backend development.
- Practiced building small backend modules to strengthen fundamentals in Java and data structures.

Spring Boot Developer Intern — Grapes Solutions

- Learned Spring Boot fundamentals including REST API development, dependency injection, and Spring Data JPA.
- Worked on building and testing backend modules using Spring Boot with a relational database.

Projects

AI-Powered Help Desk (GitHub) — 2024 – present

Built an AI-powered help desk system using Spring Boot and Spring AI for conversational customer support and issue resolution.

- Implemented real-time AI response streaming and conversation tracking using reactive APIs.
- Developed a ticket management system with priority, status, timestamps, and user email tracking using Spring Data JPA and PostgreSQL.

AI-Powered Fitness App (GitHub) — 2024 – present

Built a fitness tracking web application focused on workout and health management.

- Developed a responsive and user-friendly interface using modern frontend technologies to enhance user engagement.
- Implemented workout tracking, goal management, and AI-driven fitness suggestions for personalized user experiences.

Student Placement Portal (GitHub) — 2025 – present

Built a microservices-based placement portal for students, companies, jobs, and applications using Java and Spring Boot.

- Implemented JWT authentication, role-based authorization, API Gateway & Eureka Service Discovery.
- Developed secure REST APIs with inter-service communication using RestClient.

Coding Profile

- Solved Data Structures & Algorithms problems on LeetCode using Java, focusing on optimization and algorithmic efficiency.

Achievements & Leadership

HighFliers Club — 2021 – 2024

Progressed from Volunteer to Co-Convenor over a 3-year tenure.

- Managed and coordinated diverse teams for college-wide events and Model United Nations (MUN) activities.
- Developed strong leadership and teamwork skills through high-stakes event coordination and strategic planning.

Interests

Activities: Chess, Music, Sketching
